CONCEPT

In January 2017, after nearly two years of complex work and intensive planning, Enigma finally opened its doors just nearby from 41° Experience, where the idea began its life as an embryo.

Although the team, the philosophy, and the vision originate from that small space on Avenida Paralelo, Enigma is not just an ad hoc evolution of the finger food and cocktails experience created in 41°.

It's entirely something else. In an ethereal, slightly imposing venue which covers more than 700m², Enigma aims to present a new way of living the experience of a guest in a restaurant.

Described as “post restaurant” by journalist Pau Arenós, the guest begins a carefully curated journey that escalates throughout the night, in which a team of 35 staff prepare, serve, and explain nearly 40 dishes.

Enigma does not seek to be the new elBulli nor does it intend to create a new gastronomic revolution. It is simply the highest expression of **Albert Adrià**, not only as a chef but, perhaps more importantly, as creative mind: the respect for produce, the versatility, the surprise and eye for details. Risk-taking. Bold and reckless. The constant evolution.

GASTRONOMIC OFFER

For our diners to live a unique experience, we believe that the surprise effect is important and therefore we chose not to show the menu.

Keep in mind that we never keep the same menu for a long time because we work on the seasonality of the product.

The menu consists of around 40 elaborations among which we find snacks, finger food, spoon dishes and small cocktails.
